# Call for User Posters & Event Invitation

HPC@dtec.bw: Perspectives & Next Horizon
3rd March, 2025

contact: orga-hpc-bw@hsu-hh.de

We have successfully completed the first funding phase of the *hpc.bw* project (dtec.bw) and have achieved countless exciting calculations and results, which were made possible by the CBRZ and its compute platforms *HSUper* and *ISCC*. In relation to this achievement, we will organize a wrap-up meeting, where we will not only present the diverse results and research projects but also showcase the variety of topics and methodological approaches in the broad world of HPC in a wide range of discipline.

Invitation: We cordially **invite you to attend the public part of our wrap-up meeting** of our 1st founding period from 2021 to 2024 **on 3rd March 2025**, including a greeting by the HSU president and giving you the opportunity to gain insight into an overview of *hpc.bw* activities so far. You will find the schedule of the day on our website here.

User Poster: On this occasion, **we cordially invite you to submit a user poster for presentation** at our hpc.bw meeting on **3rd March, 2025 from 14:45-15:30.** The aim is **to share your initial calculations or existing results,** that you achieved during the first dtec.bw founding phase **using *HSUper* or *ISCC***, with other researchers relying on these resources, all at a low-effort level. Feel free to base your contribution on existing poster(s) (e.g. from prior conferences or workshops in your research field). If applicable, please include hpc.bw-specific points: **(a)** *how hpc.bw has supported your research*, and **(b)** *what you have already achieved by leveraging HPC resources*, either in general or specifically through *HSUper* and *ISCC*; **(c)** *when you write your qualification (PhD/Postdoc) within the scope of the hpc.bw projec*t. Please include respective acknowledgement of hpc.bw/dtec.bw on the poster.

The user poster should be in **size A1**. If you would like us **to print your poster**, please send us your document **by 15th February, 2025**. In the attached file, you will find a **dtec.bw-poster template** that you can use for your poster (which is, however, not obligatory!). The related dtec.bw-logo is available in the appendix. We kindly ask you to **register by 21th February, 2025** via email to **orga-hpc-bw@hsu-hh.de** if you would like to **attend the poster presentation** and the **event**. Please register with the **name of the poster presente**r and **a title of the poster**.

We are looking forward to seeing your poster and discuss with you during the event!

Philipp Neumann, on behalf of the hpc.bw-team
